Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5	45,00%	Practical tests
R1, R2, R3, R4, R5	20,00%	Attendance, active participation and favourable attitude in the subject/ course/ module
R1, R2, R3, R4, R5	35,00%	Written theoretical tests

Observations

The teacher will monitor attendance, active participation and a favorable attitude in the subject, which will account for 20% of the final grade. Within this 20%, attendance will be 10% and the remaining 10% will be obtained by participating in discussion forums and classroom activities. Throughout the course, students will carry out theoretical written tests through test-type questions that will account for 15% of the final grade.

The practical activities carried out throughout the course will be evaluated within the relevant deadlines. These activities will represent 15% of the final grade.

At the end of the course the students will take a test or final exam that will represent 50% of the grade. This test will have both theoretical (20%) and practical questions 30%.

To pass the subject, both the final exam and the final grade must have a grade of 5 or higher.

Regarding the evaluation system in the second call, for the student who has not completed or passed the required evaluation tests and assignments, the final exam will represent 100% of the final grade.

According to article 9 of the General Regulations for the Evaluation and Qualification of Official Teachings and Own Degrees of the UCV, the continuous evaluation system is the preferred evaluation system at the UCV. The art. 10 allows, however, for those students who, in a justified and accredited manner, express their inability to attend in person (or to synchronous communication activities for virtual and/or hybrid teaching modalities), their evaluation on an extraordinary basis in the so-called single evaluation. Said single evaluation must be requested within the first month of each semester to the Dean of Faculty through the Vice-Deaneries or Master's Directorates, with the express decision on the admission of said request from the student concerned being the responsibility of the latter.

The evidence to be presented and/or the test/s to be carried out in the single evaluation by the student will be the same as for the rest of the students, although the percentages awarded to the different evaluation instruments will be the following: 50% practical tests

and 50% theoretical written tests.

CLASS ATTENDANCE IN FACE-TO-FACE DEGREES

In accordance with the development guidelines of the General Regulations for the Evaluation and Qualification of Official Teachings and Own Degrees of the UCV, in face-to-face degrees, class attendance with a minimum of 80% of the sessions of each subject will be required as a requirement to be evaluated. This means that, if a student does not attend the sessions of each subject, in a percentage greater than 20%, he/she will not be able to be evaluated, neither in the first nor in the second call, unless the person responsible for the subject, with the approval of the person responsible for degree, in view of duly justified exceptional circumstances, exempt from the minimum attendance percentage. The same criterion will be applicable for hybrid or virtual degrees in which teachers must maintain the same percentage in the requirement of "presence" in the different training activities, if any, even if these are carried out in virtual environments.

MENTION OF DISTINCTION:

The mention of "Honors" may be awarded to students who have obtained a grade equal to or greater than 9.0. Their number may not exceed five percent of the students enrolled in a group in the corresponding academic year, unless the number of students enrolled is lower.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Group work sessions supervised by the teacher. Study of legal cases, both true and fictitious. Significant construction of knowledge through student interaction and activity. Critical analysis of values and social commitment.
- M8 Exposition of contents by the teacher, analysis of competences, explanation and demonstration of capacities, skills and knowledge in the classroom.
- M9 Supervised monographic sessions with shared participation.
- M10 Application of interdisciplinary knowledge.
- M11 Personalised attention and in small groups. Period of instruction and/or orientation carried out by a tutor with the aim of reviewing and discussing the materials and topics presented in the classes, seminars, readings, completion of assignments, etc.
- M12 Set of written and/or oral tests used in the initial, formative or summative evaluation of the student.

- M13** Group preparation of readings, essays, resolution of problems, seminars, papers, dossiers, etc., to be presented or delivered in theory classes, practical classes, and/or small group tutorials.
- M14** Student's study: individual preparation of readings, essays, problem-solving, seminars, works, reports, etc. to present or deliver in the theoretical classes, practical classes and/or small group tutorials.
